Spot light

Normal Mapped
Scene Object

Point light

Lighting - Danger mode (when the boss coming or the life bar for hero is low)

Particle System

Boss Projectile

2 Cameras: Final Scene Dialogue

blah blah
blah

rah rah rah

Win - destroys enemies without perishing -

YOU ARE THE CHAMPION,

YOU HAVE SAVED THE UNIVERSE

Lose - perishes

You're a person of rare intelligence.

It's rare when you show any.

- ## *Requirements 1:*
- ❑ Support 3 Scenes
 - ❑ Level 1 scene, win scene, lost scene
 - ❑ Appropriate game complexity
 - ❑ 3 object types: Game unit, projectiles, scene object, background, life bar
 - ❑ Hero, enemy, dead enemy, other enemies, boss,
 - ❑ asteroid, missile, fireball, laser, hadouken
 - ❑ Per-pixel collision detection: with hero and enemy
 - ❑ 2 Camera views: 1 camera throughout gameplay, but 2 cameras during dialogue with final boss
 - ❑ Object Behavior: Some enemies behavior include chasing the hero (rotate towards), some have their specific move pattern; boss moves and attacks are randomly selected

- ## *Requirements 2:*
- 5 lights, with all three types (point, spot, directional)
 - Direction lighting used for ambient lighting, and Danger lighting (animated)
 - 2 Spot lights used to highlight Hero and Boss appears
 - 2 Point lights used to emphasize projectile based attacks(animated)
 - Asteroid object with normal mapping
 - Particle System
 - When the enemy is hit, a particle explosion will appear
 - Particles used to create rocket like effect on projectile
 - Interpolation
 - interpolate the hero movement changes
